steering
wheels
of fortune

Our steering wheels' experience and knowhow for your benefit.....

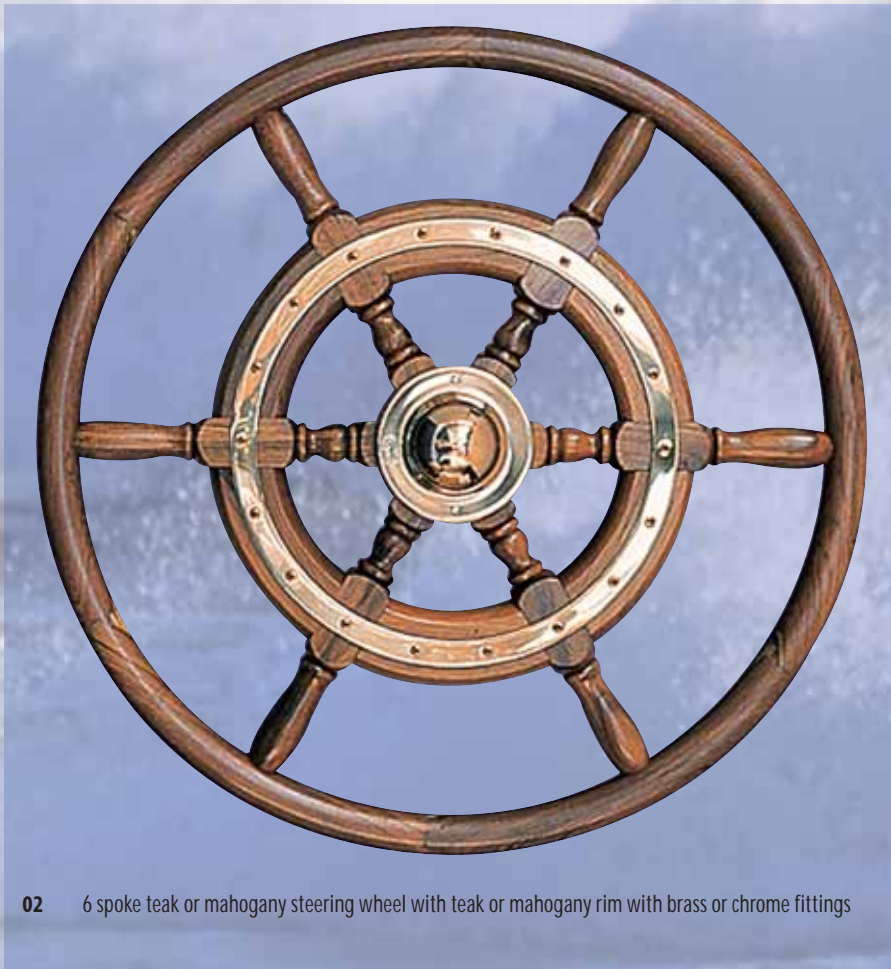

Since we began in 1931, STAZO has built a reputation by supplying only the finest quality steering wheels backed by an excellent service. Our well trained staff works with the latest tools and NC machinery to make sure all STAZO steering wheels are the best money can buy.

STAZO is proud to be one of the world's leading manufacturer of marine steering wheels, offering the largest assortment of styles and sizes.

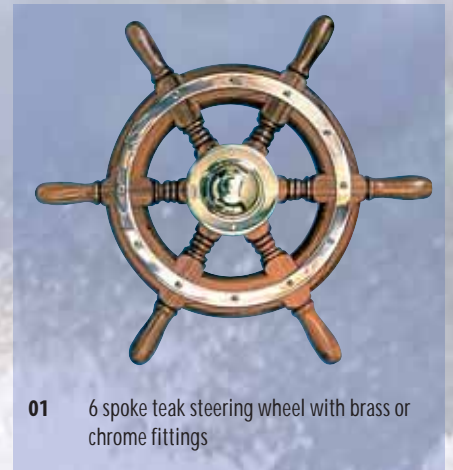

Distinguished by appearance and application

Our design department matches global styling of yacht designs with our vision to build steering wheels. In this new catalogue you will find our latest designs, made of different exotic materials.

World wide certifications

STAZO is the only manufacturer offering all steering wheels being approved and certified by CE, NMMA and Lloyd's Register of Shipping

STAZO adapters to fit to almost any steering system

STAZO steering wheels incorporate our unique adapter system to allow any wheel to fit almost any steering system**.

The adapters are interchan-

geable and fit directly into the hub of the steering wheel. Adapters come in Delrin, aluminium and in stainless steel.

**For shafts with a larger diameter than 26 mm or 1", we provide hubs with a fixed bore into the hub at an additional price.

STAZO custom built steering wheels

You name it, we make it...!! Over the years STAZO has also built a reputation on custom built wheels, serving the individual needs of many individual customers. Custom wheels can be made of traditional materials like wood, stainless steel, aluminium, but also of exotic materials like for instance carbon fibre.

STAZO grips

Foldable grips for fast manoeuvring. Available in brass and chromium plated brass. Order number 21.0012.1 (brass) or 21.0012.2 (chrome).

STAZO badge- and laser-logo service

STAZO steering wheels are provided with a so called "lens badge". We also design and arrange custom badges with any required logo at request. Besides laser applications enable us to design and engrave any logo at nearly any surface.
